About VDX

VDX provides bespoke data management and tracking solutions using blockchain technology to empower businesses and organisations.

Our vision is to disrupt and irrevocably transform the creation and verification of all digital credentials over the blockchain. These VDX blockchain certified credentials can be shared securely, instantly and globally with a fraction of the cost compared to the current verification process.

Why Blockchain?

The benefits of blockchain are now going beyond the world of finance into other industries, including education, where trust is extremely important.

Blockchain technology has the ability to be the backbone of educational proof, giving employers the information required to determine whether a candidate's CV is accurate. Blockchain technology allows students to build up a secure, verifiable digital record of formal qualifications, experience and soft skills gained over their lifetime.

Our Platform

User friendly interface

Python based code written to perfection

Can be used as a portal with all the functionalities embedded or as a white label engine

To Issue a Document

To Verify a Document

Examples

An example of digital certificate generated by VDX portal with verified QR code.

Our Customers

VDX is used by Navitas group, which is one of the largest education providers in the world. Navitas offers an extensive range of educational services through three major Divisions to students and professionals including university programs, creative media education, professional education, English language training and settlement services.

Why us

We can run on any blockchain (Bitcoin blockchain, Ethereum blockchain or Litecoin blockchain) or on the private ones.

We can adapt to any customer-driven file format.

We offer a customised platform or white label engine that can be connected to any platform using RestFUL API .
